Toshiba Satellite Radius 11 - The ultimate cook along companion

Make cumbersome cookbooks a thing of the past with the Toshiba Satellite Radius 11, a Windows 8.1 laptop and a tablet all in one. Your perfectly portable kitchen companion, its touchscreen makes it easy to flick through recipes, or catch up on your favourite TV cookery programmes online and cook along in your kitchen at the same time.

Turn over to discover the Satellite Radius 11's other great features...

Leading Innovation >>>

The innovative hinge lets you transform the Satellite Radius 11 into any one of five different modes – laptop, tabletop, presentation, audience and tablet

When flipped round to audience mode, you can easily set it up in your kitchen to use the touchscreen to flick through your favourite recipes and position the speakers so the sound is perfectly clear

Amazingly compact, the Satellite Radius 11 easily fits onto kitchen worktops, and when in tablet mode the 29.5cm (11.6") devices take up less space than a traditional cookbook, giving you more room to get creative

The built-in high-quality webcam and microphone lets you easily chat with friends or take part in group Skype calls whilst you're in the kitchen

Cookery programmes, video tutorials and interactive cookbooks are brought to life with the Satellite Radius 11's high-quality HD screen and DTS Sound™ enhanced stereo speakers
